ANNEX: MANAGEMENT POLICY

Fecha emisión: 02/12/16

Fecha Edición: 07/02/17

The key objective of Tank Aluminum Cover is to guarantee the highest possible rigor when carrying out your projects and technical assistance.

Tank Aluminum Cover customers need to obtain total reliability of the projects and reports to guarantee the quality and professionalism of the carried out work.

Rigor, reliability, reach and flexibility, as well as the accuracy and precision in the realization of the designs must guarantee a competitive place in the market and the loyalty of the clients, always taking into account the maximum respect to the environment with respect to protection and pollution prevention.

The directorate is responsible for establishing the principles, marking and reviewing the quality and environmental objectives and guaranteeing the necessary resources to achieve them, as well as the commitment to comply with the requirements and to improve the effectiveness of the management system. The Tank Aluminum Cover Directorate is committed to ensure a good professional practice and the quality of the work it performs, as well as compliance with current regulations and customer requirements.

These general objectives are pursued through optimization of resources, technical competence, motivation and training of staff, good internal management, teamwork and compliance with applicable legal requirements and other requirements established by the Directorate.

The Direction reviews and approves the company's risk assessment, which analyzes the possible risks of all company processes, preventing and avoiding deviations, and making decisions to minimize possible nonconformities.

The Tank Aluminum Cover management system has adopted the concept of continuous improvement, optimizing the requirements, requirements, resources, flexibility of services and good attention to our customers. We firmly believe that these are the key factors to demonstrate proper business management and ensure the continuity of our activity in the future in a sustainable way through the responsible use of resources and the search for technical solutions in our designs as environmentally friendly as possible, always according to the applicable technical regulations.

The management controls, confirms and notifies all the documentation and asks all the personnel to assume the commitment of the Quality and Environmental aspects of the system to put them into practice permanently with the purpose that they influence and benefit the whole collective and the customers, in this way the management promotes the continuous improvement of the system.

The policy is reviewed periodically to ensure continued adequacy in relation to changing circumstances. It is communicated to all the personnel of the organization and it is publicly available for its knowledge by all the interested parties.

We are grateful for the support of this policy on the part of all.
